

SUPPORTING YOUR CHILD WITH RESPONSIBLE USE OF MOBILE DEVICES

Hallett Cove School has a Student use of Mobile Phones and Personal Devices Policy in place to support students in developing positive and responsible device use. Parents and caregivers also play a key role in developing responsible habits in their children when using mobile phones and devices.

One way of supporting your child with the use of their devices is through a parent controlled screen time feature. This feature enables you to monitor how much time your child is spending on their device, what apps they are using, and set limits for how long they can use their device or individual apps. We encourage parents to enable this feature on their child's devices, to support the development of positive and responsible device use whilst at school and home.

To enable parental control features, please follow the instructions below.
